By Lee F. Rogers MD, O. Clark West MD : Imaging Skeletal Trauma, 4e aug 03 2017nbsp;in 1886 professor jean martin charcot of france 1825 1893 and his student pierre marie 1853 1940 published the first description of distal muscle aug 03 2017nbsp;patients with charcot marie tooth cmt disease have a significant family history this history varies depending on the inheritance and penetrance pattern Imaging Skeletal Trauma, 4e:

1 of 1 review helpful Extremely High Yield Perfect for residents By rad22 This book is great for radiology residents It is well organized very high yield and a quick read only 230 pages The chapters are based on anatomy hand shoulder c spine knee etc and contain high yield check lists at the beginning of each chapter that include common sites of injury

in adults and kids where to look when you see something Last published over a decade ago this classic radiology text has been exhaustively updated by leading experts to provide the latest techniques and advances available in radiology today Exceptional in scope and lavishly illustrated throughout Imaging of Skeletal Trauma continues to offer a comprehensive view of diagnostic imaging in the evaluation of skeletal trauma now in one consolidated single volume the change in focus from an authoritative refer All radiologists who report skeletal trauma would benefit from reading this book and I am sure it will be a big hit with trainees also ed by RAD Magazine June 2015
