By Dominik G. Rabus : Optofluidics Systems Technology well known for its world renowned peer reviewed program cleo unites the field of lasers and electro optics by bringing together all aspects of laser technology and well known for its world renowned peer reviewed program cleo unites the field of lasers and electro optics by bringing together all aspects of laser technology and Optofluidics Systems Technology:

At the cross roads of biology microfluidics and photonics the field of optofluidics allows for quick and compact solutions for medical and biochemical sensing and manipulation This book is concerned with the ingredients for a

polymer based platform which is able to culture and pattern life cells for a sufficient period of time enables the integration of photonic devices and provides means to integrate electronic readout Thus in its cross discipline appro
